

## Filing Annual Business Taxes for an LLC, Corporation, or Incorporated Business

**Important:** Your business is a separate legal entity, and business tax filings are separate from personal tax filings.

When meeting with your accountant to prepare and file your annual business tax return, please be aware of the following:

- Annual business tax preparation fees typically start between **\$600 and \$800**.
- The total cost will vary depending on the complexity of your business tax return.
- More complex returns may require additional time and preparation, resulting in higher fees.

**Please note:** Tax preparation fees and services are discussed directly between you and your accountant.

**For newly formed LLCs, Corporations, and Incorporated businesses, Gurin & Gurin, PC must file a tax extension on behalf of your business by March 15. If an extension is not filed by this date, the IRS will consider the return late and assess penalties against the business.**

**Please notify our office by February 1st if you would like us to prepare and file the extension.**

**Reminder:** Your **personal tax return** is separate from your **business tax return** and may require additional preparation and filing.
